## MILK COOLERS

**NEW DESIGN. NATURAL REFRIGERATION. KEEPS MILK FRESH LONGER.**

True's forced-air milk coolers (TMC series) feature oversized refrigeration systems designed to hold milk at 33°F to 38°F. Colder milk results in increased sales and less spoilage. Units feature conveniently designed self-service drop-front and flip-top doors. True's forced-air advantage allows milk products to remain cold even with access doors open and eliminates the ice build up associated with cold wall construction.

Now all True Milk Coolers use R290 Hydrocarbon refrigerant. Hydrocarbon (HC) refrigerants are natural, nontoxic refrigerants that have zero ozone depleting properties and low global warming potential. Hydrocarbons are one of the most climate-friendly and cost-effective refrigerants to cool and freeze.
